About Me

I am a JavaScript enthusiast and using JavaScript in both front end and backend interests me.
I love coding things from scratch, but I can work with front-end frameworks like Bootstrap too.

WORK

Present — **Talentica Software**
Software Engineer

Mar 2017 - Current
- Tv2Consulting
  Developing backend on Nodejs for a TV application. Responsible for streaming video by key generation using DRM.

Jan 2016 - Mar 2017
- QuantumSignals
  The Online platform aims at testing user competency in the respective skills. It would then allow the members to apply for jobs. We used MERN as our tech stack.

Jun 2014 - Nov 2015 — **AKS Software**
Associate Software Developer

- AMS-Agriculture management System.
  The application recorded harvest crop cultivated by farmers,processsed these crops and paid them based on this.I worked on website and web app for hand held devices.
